

MSK Direct by Memorial Sloan Kettering World-Class Cancer Care, No Matter Where You Live.

Cancer can affect anyone, but not everyone lives near a top cancer center. That's why Brown & Brown, Inc. partnered with Memorial Sloan Kettering Cancer Center (MSK) to offer you MSK Direct. MSK Direct is your resource for prevention through diagnosis and ongoing treatment in cancer care, providing practical and emotional support, no matter where you live.*

**available in most states*

Cancer Center

MSK Direct

How It Works

Contact MSK Direct if you or a family member has been diagnosed with cancer, has been told by a doctor there is a suspicion of cancer, or would like to discuss treatment options. An MSK Direct Care Advisor will help you find the best cancer care possible, either through onsite care at MSK, or remotely, where MSK doctors guide your treatment in partnership with your local doctor.

no need to enroll • clinical care is billed through your insurance • patients are responsible for applicable copays, coinsurance, and deductibles for the medical services received from MSK • MSK Direct is open to all all Brown & Brown, Inc. teammates and their family members (pending insurance verification) • Virtual services are covered through UnitedHealthcare plans • MSK is an in-network provider for the Brown & Brown, Inc. health plan administered by UnitedHealthcare

To get started with MSK Direct, call the Brown & Brown, Inc. dedicated phone line at: [833-516-1113](tel:833-516-1113), or visit mskcc.org/bbins.

Everyone deserves access to the best possible cancer care — whenever you need it, wherever you live.

For **on-site** care at MSK, MSK Direct will:

- schedule an initial appointment at your convenience, as quickly as within two days
- gather all necessary medical records
- meet you at the first appointment to provide support, logistical assistance, and introductions to your care team
- remain a resource throughout your course of care at MSK

For **virtual** care close to home, MSK doctors and nurses will collaborate with your local doctors to:

- provide a comprehensive diagnosis from pathologists and radiologists specialized in your specific type of cancer, based on tissue samples, original imaging, and genetic testing (when clinically appropriate)
- recommend the best hospitals close to where you live, using a proprietary tool only available from MSK
- develop a treatment plan informed by a multidisciplinary team that may include subspecialized MSK medical, surgical, and radiation oncologists
- provide education and support to help identify clinical trials that could open up new treatment options
- provide expert care in collaboration between you, your MSK doctors and your local doctors at key decision points in your care

For your overall well-being and peace of mind, MSK Direct provides screening and prevention resources and informational webinars to help you reduce your risk for cancer.

MSK has locations in New York City and throughout New York State and New Jersey, and is available remotely anywhere in the US.
